

# AggregateSpend360™

First-to-Market and Global Market Share Leader

With increased transparency requirements and the trend towards global compliance, it is increasingly important to have a holistic approach to aggregate spend and disclosure reporting. AggregateSpend360™ is an innovative solution to integrate, track and manage all financial interactions with HCPs across the enterprise to better respond to compliance, transparency, and business requirements.

## Increase insight on HCP payments

- Simplify data integration and consolidation processes
- Rationalize data for one view of the customer
- Gain better visibility and real time access to enterprise-wide spend on HCPs
- Option to use on top of your existing aggregate spend solution to consolidate, standardize, and organize third-party spend data.

## Benefit from automated report generation

- Flexible business rules engine transforms, aggregates, and reports data
- Automated report generation per specific legislation
- Ability to conduct aggregate spend analysis and “what if” analysis

---

## Gain confidence that you'll always be compliant

- Ensure that you comply with global and local regulations and codes of ethics
- Prebuilt reporting templates and automated report due-date reminders
- Align compliance standards across the enterprise and across geographies

AggregateSpend360 offers a robust set of features designed to meet current transparency and reporting requirements, and efficiently adapt to future demands.

---
